Slat blinds combine perfect daylight control with atmospheric darkening – for a pleasant indoor climate and an inviting ambiance. They ensure cool rooms in summer and reduce heat loss in winter, making them a consciously energy-efficient solution.

These elegant façade design elements impress with their functionality and aesthetics and are versatile – whether at home, in the office or on exposed buildings.

Thanks to their stability, they act as a deterrent to burglars, especially for ground-floor rooms.

With individual customisation options, such as the integrated insect screen, our slat blinds set new standards.

We are happy to support you through the entire process, from planning through to installation and aftercare. Discover the versatility and elegance of our slat blinds now.

Our service includes:

- **Individual consultation:** Find the perfect solution for your home.
- **Professional installation:** Fast, clean and precise.
- **Regular maintenance:** For long-term reliability and functionality.
- **Repairs:** We repair all slat blinds, including those from third-party suppliers.

The Sophisticated

GM all-metal blind

In figures:

Width

min. 600 mm
|
max. 3000 mm

Clearance

min. 560 mm
|
max. 4000 mm

Maximum area

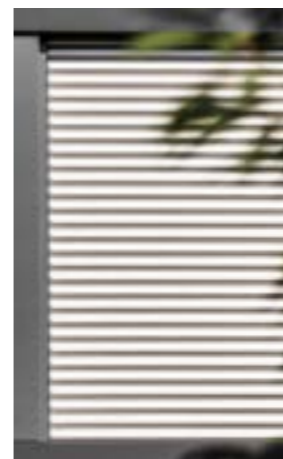

8 m²

Maximum wind speed

92 km/h
Wind resistance class 6

Invisible highlights. Ingeniously integrated into the guide.

This elegant all-metal blind is our standout model in our range of slat blinds. What is particularly striking about it is that no lifting or tilting tapes are required at all, enabling a seamless look.

The rocking and gathering mechanism, invisibly integrated into the side guides, not only enables maximum darkening and thermal insulation but also makes cleaning particularly easy. Thanks to the integrated anti-lift device, the blind enhances your burglary protection.

Wind-stable, robust and durable – the all-metal blind is unique. In terms of colours, it is similar to the other models – available in 30 standard colours and in any RAL colour imaginable upon request.

Your benefits:

- Round or square slat profile
- No lifting or tilting tapes – the mechanism is invisibly integrated into the guides
- Enables optimal darkening and thermal insulation
- Easy to clean
- With integrated anti-lift device for maximum protection
- Very robust and wind-stable
- Minergie-certified
- Lintel or front-mounted installation possible
- Manual drive or convenient control via remote control, wall switch or smart home system

The Stylish

MV metal composite slat blind

The evolution that showcases its strengths even more.

The MV metal composite slat blind meets the highest architectural and functional requirements. In addition to the familiar strengths of the classic composite slat blind, it offers more security thanks to its active locking mechanism and special slat guide.

Robust, low-maintenance and featuring a high-quality design, it is suitable for all types of buildings. And because it operates without lifting tapes, it provides maximum darkening and optimal thermal insulation.

In short: the MV metal composite slat blind is the ideal choice if you are after premium quality and versatility. Available in 30 standard colours and, upon request, in any colour of your choice.

Your benefits:

- Z-shaped slat profile
- No lifting tapes – low-noise toothed belt invisibly integrated into the guide
- Enables optimal darkening and thermal insulation
- With integrated anti-lift device for maximum protection
- Minergie-certified
- Lintel or front-mounted installation possible
- Manual drive or convenient control via remote control, wall switch or smart home system
- Optionally with soft-closing for quieter closing and smoother slat movement

In figures:

Width

The Classic

VR composite slat blind

The Classic: VR composite slat blind

Directs the light exactly where you want it.

Our composite slat blind impresses with its wide range of applications and can be adapted to any building environment, both visually and technically. Thanks to the special shaping of its slats, it offers infinitely adjustable, precise daylight control – enabling you to actively shape the lighting atmosphere in your rooms.

Whether you're seeking enhanced living comfort, perfect working conditions or a restful night's sleep: the composite slat blind offers maximum flexibility. The proven slat blind technology is easy to operate and extremely popular. This model is also available in 30 standard colours or as a custom-made version in any colour of your choice.

Your benefits:

- Z-shaped slat profile
- Minergie-certified
- Lintel or front-mounted installation possible
- With profile or cord guide
- Manual drive or convenient control via remote control, wall switch or smart home system
- Optionally available as a wind-stable version (up to 92 km/h)
- Optionally available with integrated insect screen (only for 70 mm slat width)
- Optionally with acoustic insulation bracket to reduce noise
- Optionally with soft-closing for quieter closing and smoother slat movement

The Timeless

KR convex slat blind

Tradition reimaged.

Our convex slat blind makes a unique design statement. It features a high-quality, timeless look and elegant convex slat profile. Thanks to its wide range of applications, it is ideal for detached houses, apartment blocks and public buildings. Space-saving in installation, it is also the perfect choice for renovations. The infinitely adjustable slats create a customised lighting design, while the simple operation and low-noise technology ensure maximum comfort.

All these qualities make the convex slat blind one of our favourites.

To ensure it meets your taste, we also offer the blind in a wide range of colours.

Your benefits:

- Flat, slightly rounded slat profile
- Ideally suited for renovations
- Ideal for buildings with glass façades
- Lintel or front-mounted installation possible
- With profile or cord guide
- Manual drive or convenient control via remote control, wall switch or smart home system
- Optionally available with integrated insect screen
- Optionally available with acoustic insulation bracket to reduce noise

The Minimalist

EC economy slat blind

Stripped back to the essentials.

This discreet economy slat blind is our solution if you are after an attractive, lightweight design. It is the ideal choice wherever an open and elegant façade design is desired. The extremely flat slat profile and the delicate cord guides integrate perfectly into any façade, enhancing the view to the outside and enabling optimal daylight control.

This simply designed slat blind covers the basic requirements for sun protection, glare control and privacy, and thanks to its compact construction, is also ideally suited for renovations. We offer more than just the basic range of colours for this model.

Your benefits:

- Flat, slightly rounded slat profile
- Superior form flexibility
- Ideally suited for renovations
- Minergie-certified
- Lintel or front-mounted installation possible
- With profile or cord guide
- Manual drive or convenient control via remote control, wall switch or smart home system
- Optionally available with integrated insect screen (only for 70 mm slat width)
- Optionally with acoustic insulation bracket to reduce noise

Colours as individual as your architecture

Our slat blinds are available in all RAL colours, offering maximum design freedom and seamless integration into any façade. Whether subtly coordinated or deliberately accentuated:

You choose the shade that reflects your style.

Find all standard colours here

The panel:
A design element in its own right

In this installation scenario, the blind is installed in the open lintel and covered by an elegant panel.

It not only protects the mechanism but also contributes to the aesthetic design of the façade. **You can therefore choose from a wide variety of different shapes.**

Light optimisation for vibrant rooms.

Our slat blinds showcase daylight in a unique way, especially with the light-optimised option*.

Thanks to the different distances between the slats, three light zones are created: while the upper section allows pleasant daylight to flood in, the middle section creates a glare-free working atmosphere – ideal for screen-based tasks or focused reading.

The closed lower section also ensures privacy and sun protection without darkening the room.

A practical advantage: the working position prevents sudden shifts in light. As the blind lowers, the slats initially remain open – only at the last moment do they close completely. This ensures the room remains naturally lit for as long as possible.

Light-optimised option.

* Only available for the VR and KR models.
